Mr. Christ reported the Division's new licensure system has been named DELPROS. He informed that the new system is based off the Salesforce Basic Government Solution platform in which Ohio, Arizona and Wisconsin have been successful in utilizing similar online licensure system. In the near future, licenses will no longer be printed as the licensee will be able to print their own at will. The new system will increase productivity with quicker turn-around times and lowers the risk of mishandling paper files. Mr. Christ reported that within the next month we will display the portal interface of the new licensure system to the public, but the system will not be live until October 2019.
